

Presentation by Granicus, a platform to live-stream Board meetings:

Granicus is a civic engagement platform used by many of our neighbors, including the City of Redwood City and County Board of Supervisors, to livestream board meetings. This platform solution offering from Granicus would allow us to livestream upcoming board meetings so that the public can participate in the meetings remotely.

Granicus will be giving us a quick demo including uploading existing agenda, in-meeting indexing process, and the video experience from a resident perspective. The last 5 minutes will be reserved for questions.
